

Desktop Radio

Key Features

Desktop radio for non-portable office use.

No need to recharge.

Powered from the mains via a mains adaptor. Can be powered by 12v with optional lead. Internal rechargeable back-up battery allowing use during mains failure. Can also be used with non-rechargeable Alkaline AA batteries.

Scan function.

Can be programmed to scan multiple channels. Useful if you want each handheld radio to use a different channel for privacy.

VOX

Transmit without pressing buttons. If using plug in accessories they must be designed for VOX use. Adjust VOX sensitivity to get best results.

Call Key

Pressing Call will cause a ringing sound to alert the other users. This ringing tone can be changed.

Earpiece Socket

Sockets on the side allows the use of earpieces , microphones etc for privacy.
