

Six Way Charging Base

Page 1 of 1

Convenient:

Charges six radios from one mains socket. Contains six radios in one easily transportable package.

Economical:

Uses the chargers often bundled with new radios. Why buy a complete six-way charger when you already have six single chargers?.

Robust:

UK made in very strong epoxy coated steel. Resistant to knocks and scrapes.

Reliable:

Uses original manufacturers charging pods. If an individual pod ever fails you know spares will be available.

Repairable:

Internal power supply, mains switch and lead are industrial standard components easily replaced if they ever fail.

Available for.

Kenwood, Motorola, Icom, Tait, Maxon, Yaesu, Vertex and other makes.

NOTE. Pricing is for the charging base only. Charging pods are normally supplied with new radios. Where we supply the new radios we will assemble and test it for you at no extra charge.
